### 1. Lab 1: Introduction to SQL Server Integration Services

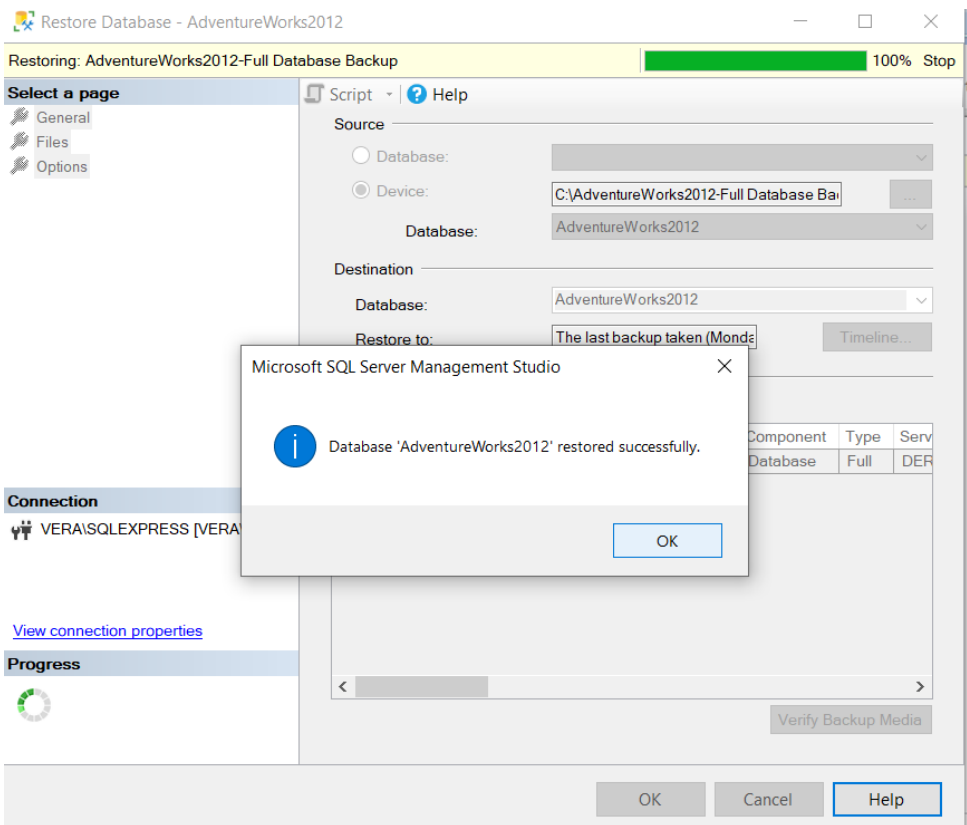

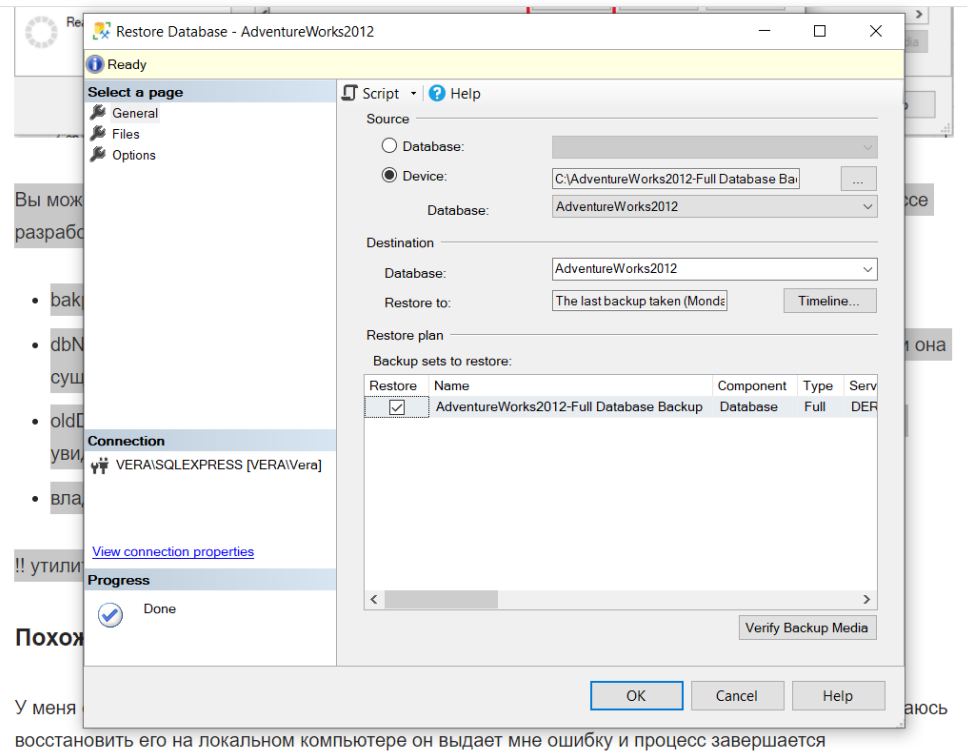

The Marketing department at Adventure Works requires a current list of the currencies used in the AdventureWorks2012 database. They want the list in the format of a comma-delimited text file.

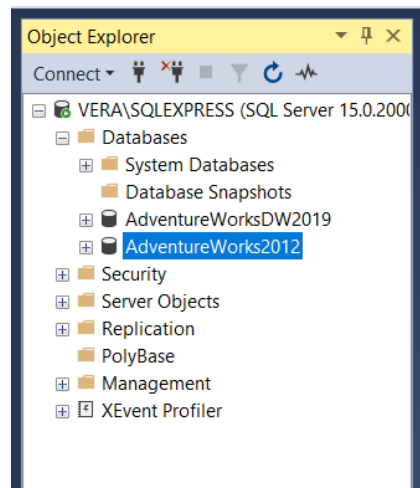

#### 1.1. Exercise 1: Using the Import and Export Wizard Scenario

Let's load the AdventureWorks2012 database into Microsoft SQL Server.

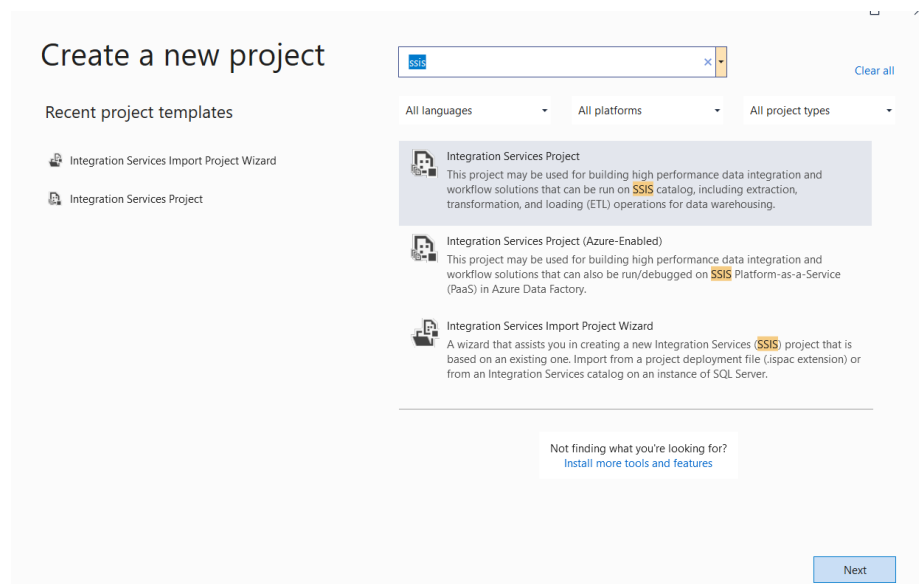

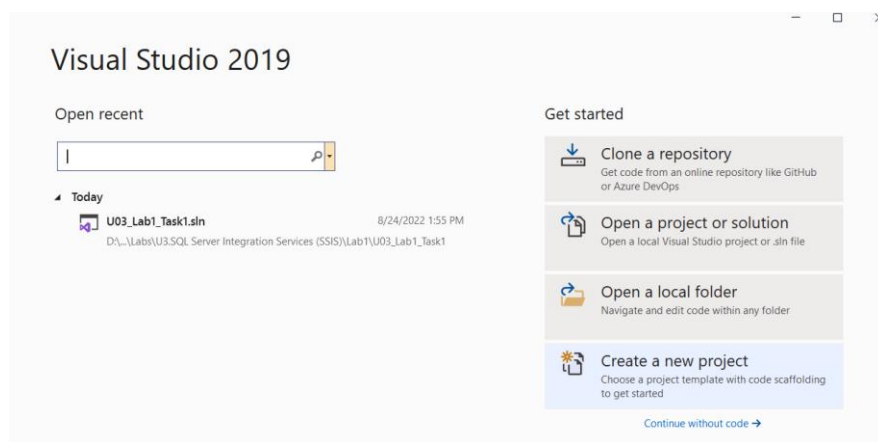

Let's create a new project in Visual Studio 2019.

# Configure your new project

## Integration Services Project

Project name

U03\_Lab1\_Task1

Location

D:\Vera\IDatamola\_2022\Labs\U3.SQL Server Integration Services (SSIS)\Lab1\scripts

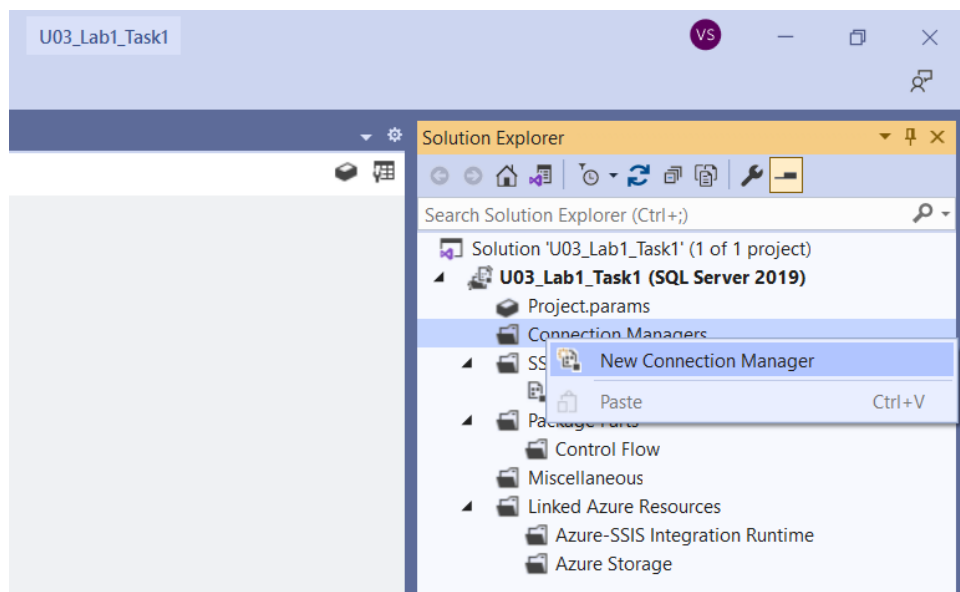

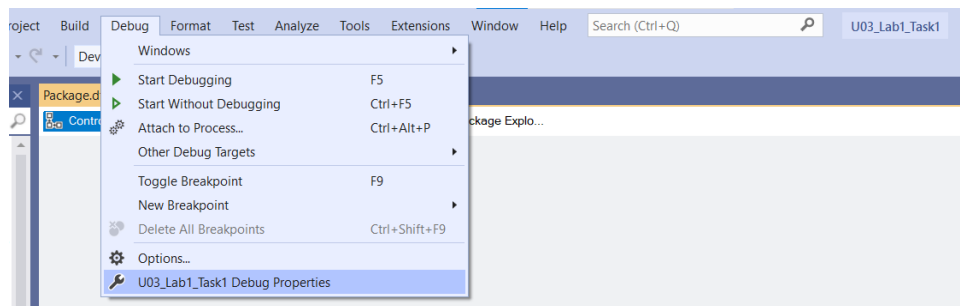

Solution name ⓘ

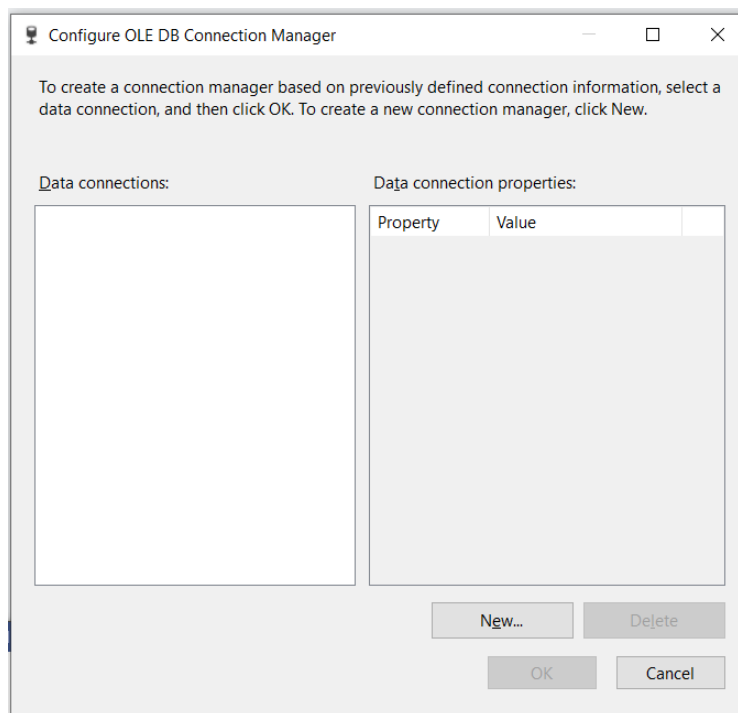

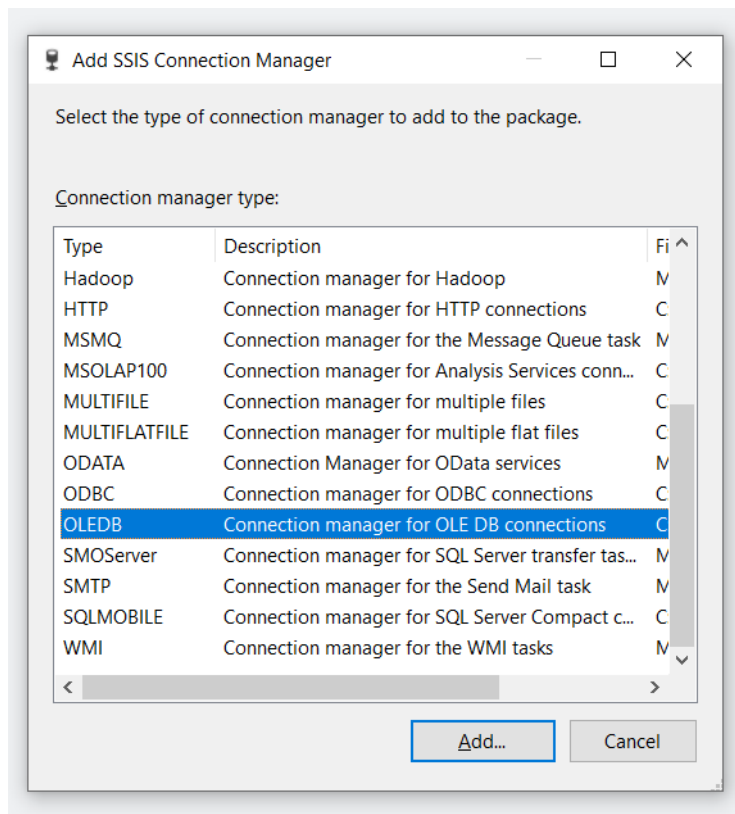

U03\_Lab1\_Task1

☒ Place solution and project in the same directory

Back

Create

Connection Manager

Provider: Native OLE DB\SQL Server Native Client 11.0

Connection

Server name: VERA\SQLEXPRESS Refresh

Log on to the server

Authentication: Windows Authentication

User name: Password: Save my password

Connect to a database

Select or enter a database name:

- AdventureWorks2012
- AdventureWorksDW2019
- master
- model
- msdb
- tempdb

Test Connection OK Cancel Help

Configure OLE DB Connection Manager

To create a connection manager based on previously defined connection information, select a data connection, and then click OK. To create a new connection manager, click New.

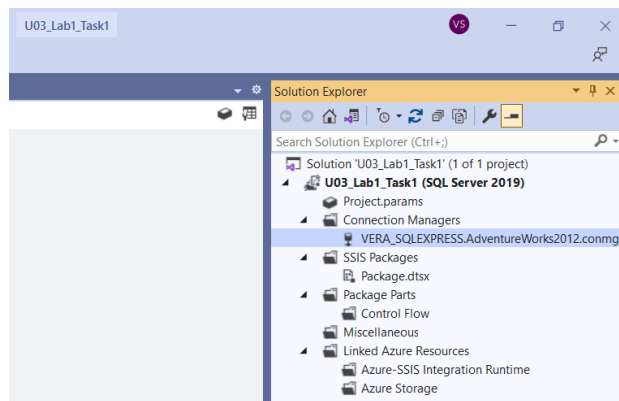

Data connections:

VERA\SQLEXPRESS.AdventureWorks2012

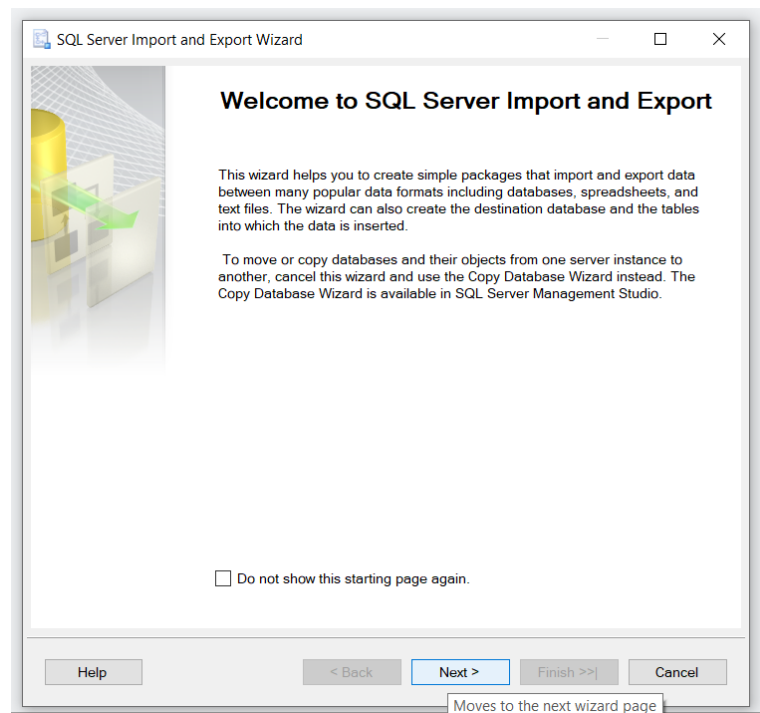

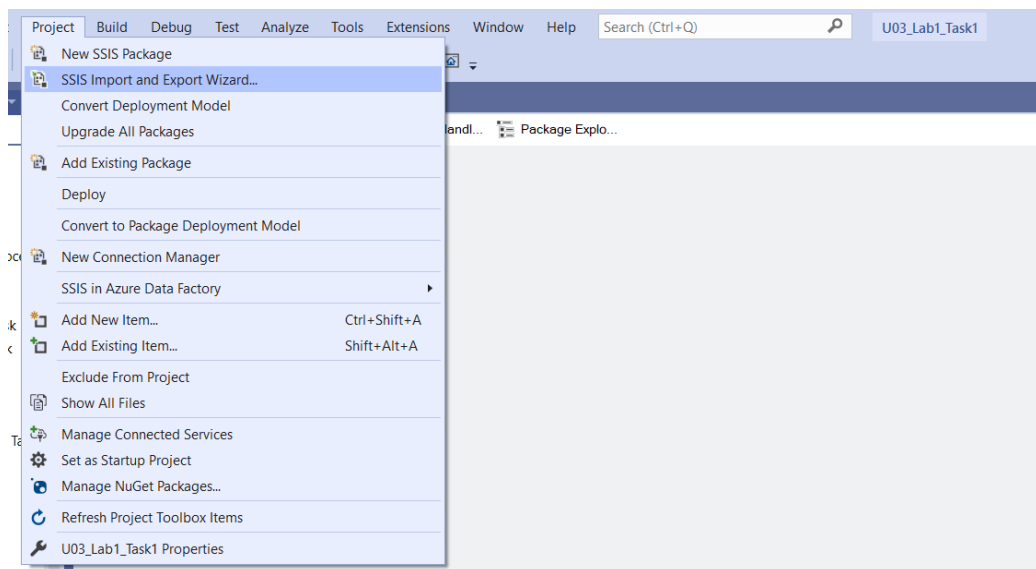

Data connection properties:

Property	Value
Data Source	VERA\SQLEXPRESS
Initial Catalog	AdventureWorks2012
Integrated Se...	SSPI
Provider	SQLNCLI11.1

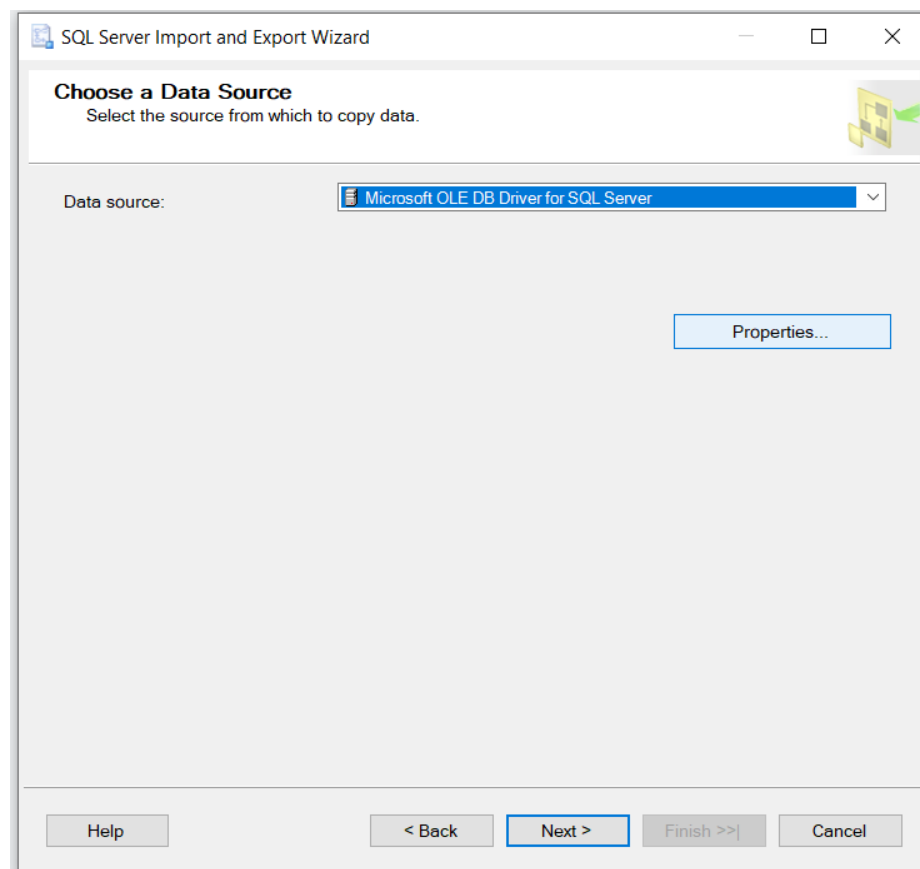

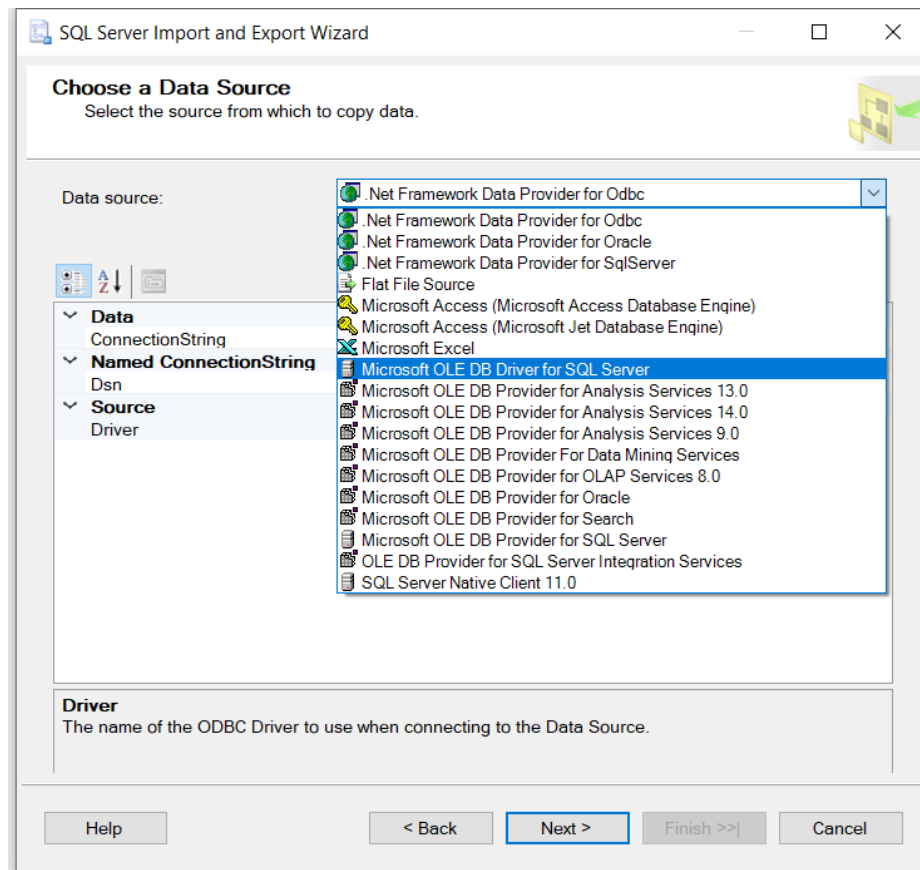

New... Delete OK Cancel

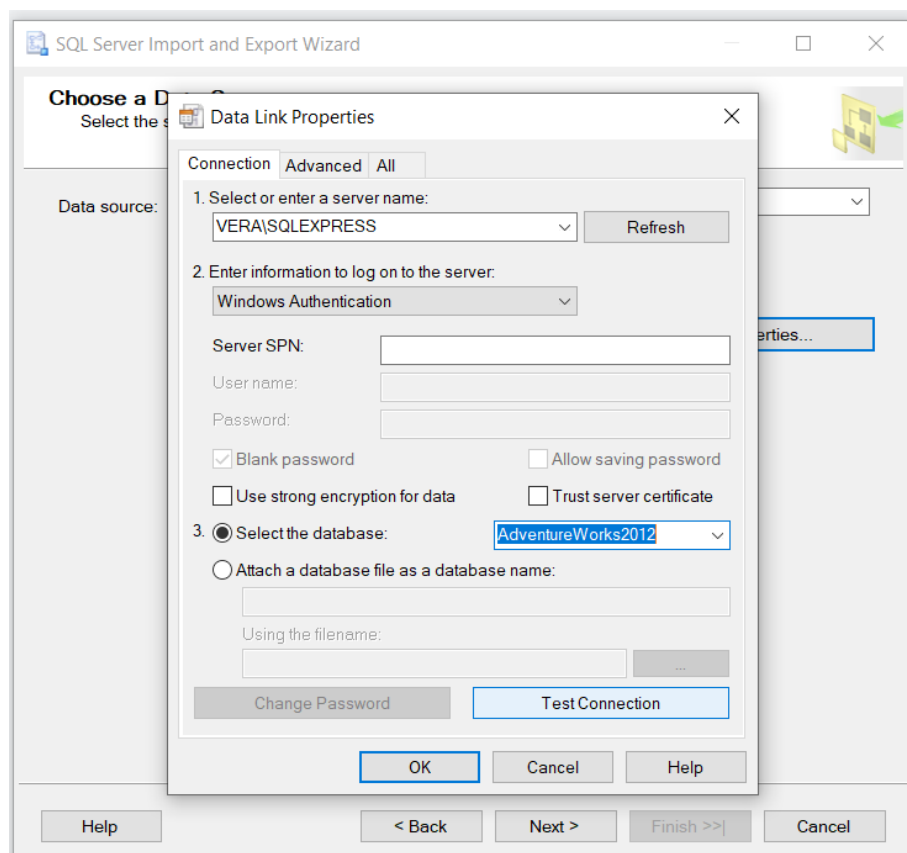

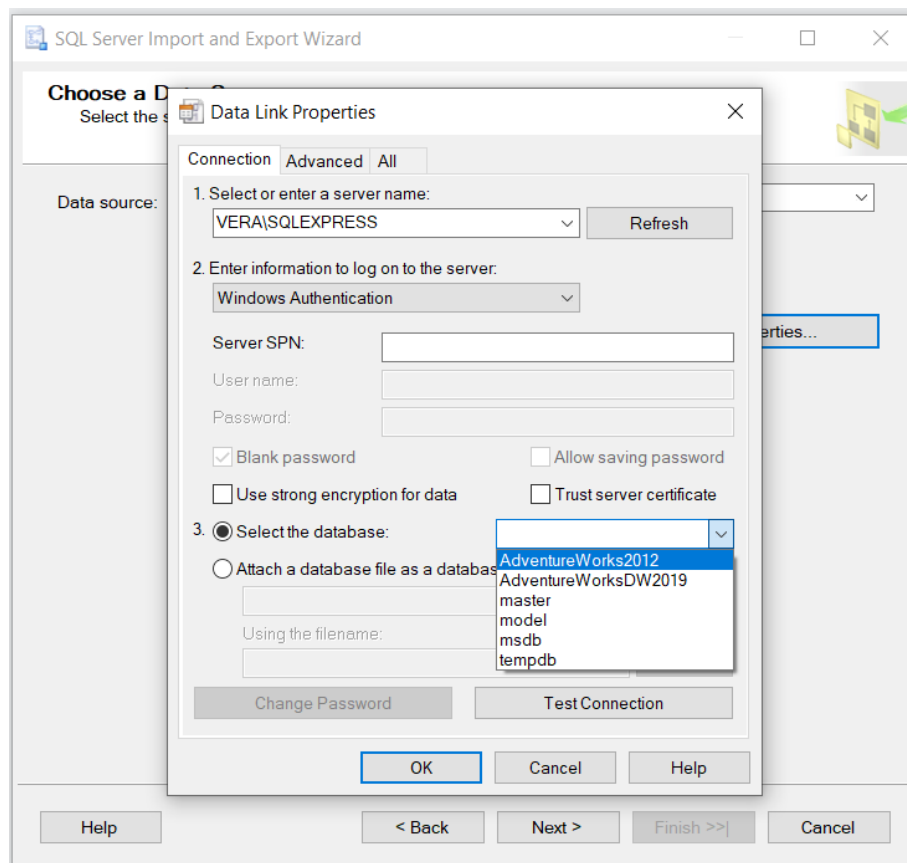

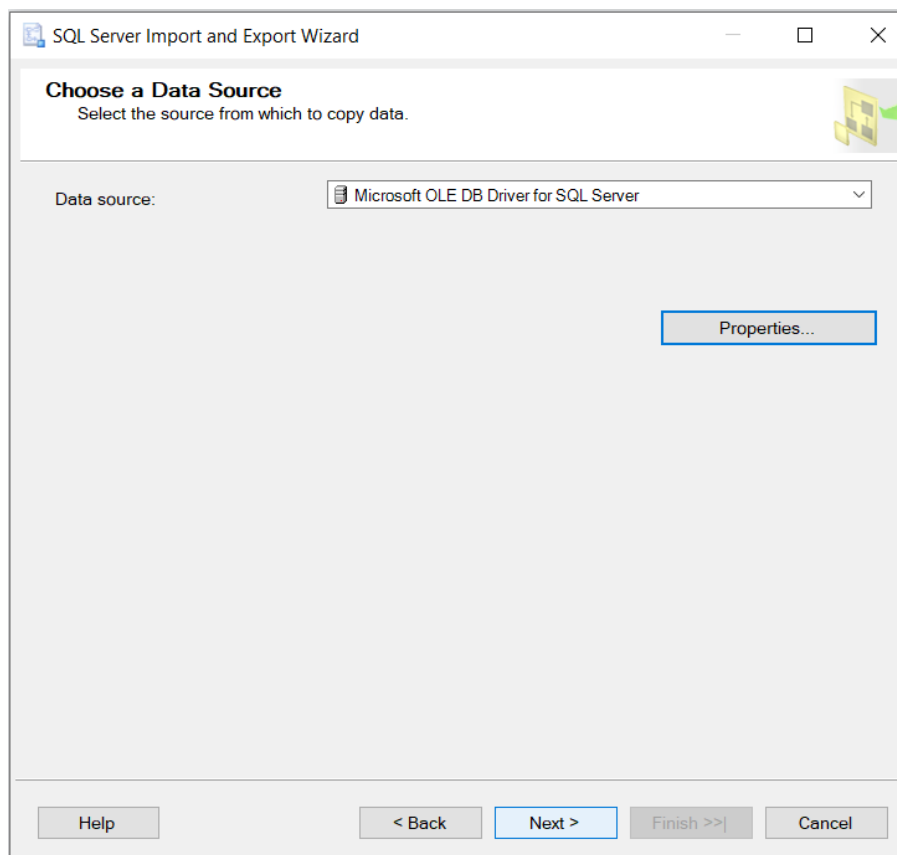

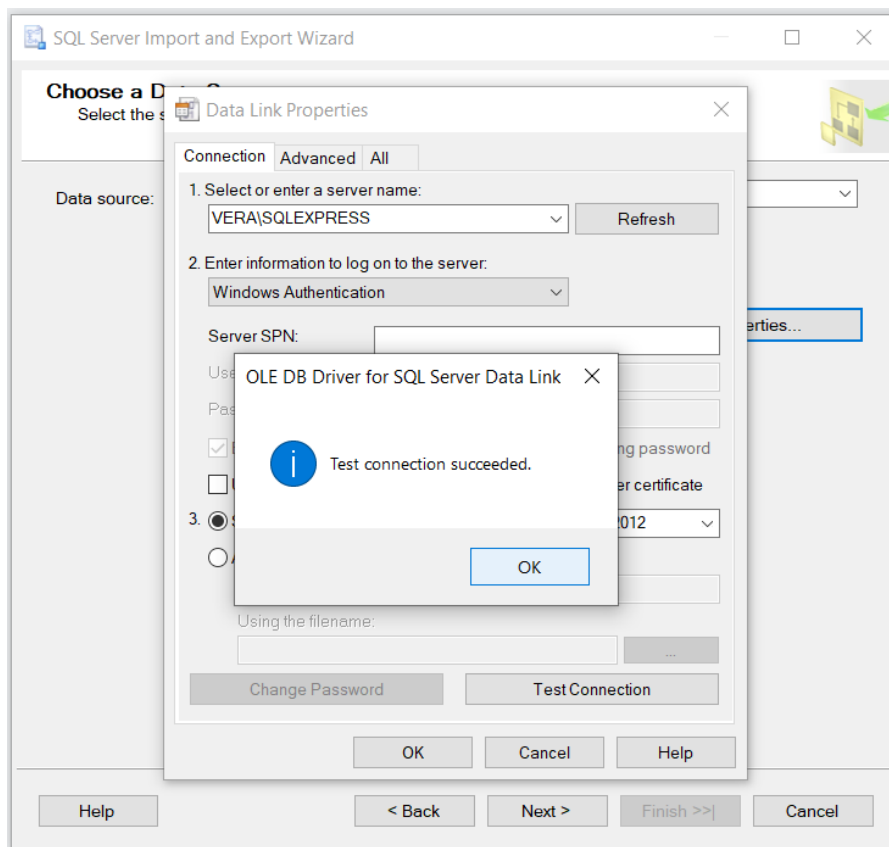

Let's load the package using Import and Export Wizard.

SQL Server Import and Export Wizard

### Choose a Destination

Specify where to copy data to.

Destination: Flat File Destination

Select a file and specify the file properties and the file format.

File name: Integration Services (SSIS)\Lab1\scripts\U03\_Lab1\_Task1\Currency.txt Browse...

Locale: English (United States) ☒ Unicode

Code page: 1252 (ANSI - Latin I)

Format: Delimited

Text qualifier: <none>

☒ Column names in the first data row

Help < Back Next > Finish >> Cancel

Moves to the next wizard page

SQL Server Import and Export Wizard

### Specify Table Copy or Query

Specify whether to copy one or more tables and views or to copy the results of a query from the data source.

☐ Copy data from one or more tables or views

Use this option to copy all the data from the existing tables or views in the source database.

☒ Write a query to specify the data to transfer

Use this option to write an SQL query to manipulate or to restrict the source data for the copy operation.

SQL Server Import and Export Wizard

### Complete the Wizard

Verify the choices made in the wizard and click Finish.

**Click Finish to perform the following actions:**

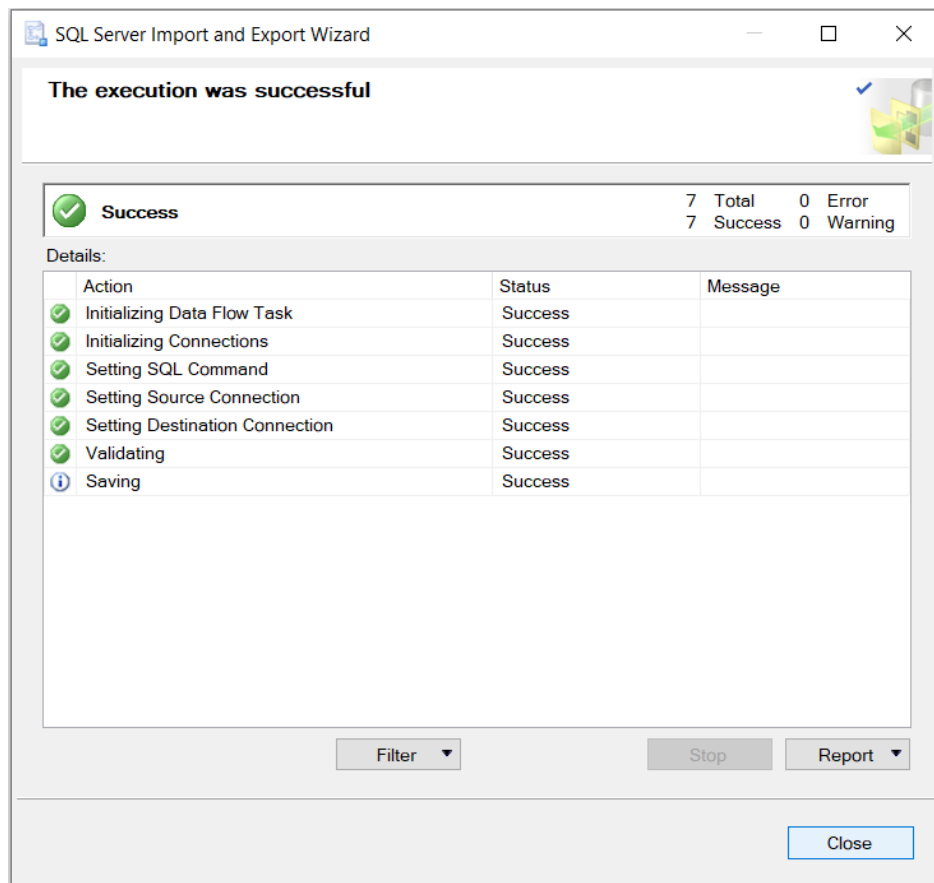

Source Location : VERA\SQLEXPRESS  
Source Provider : MSOLEDBSQL1

- Copy rows from [Query] to D:\Vera\Datamola\_2022\Labs\U3.SQL Server Integration Services (SSIS)\Lab1\scripts\U03\_Lab1\_Task1\Currency.txt  
The new target table will be created.
- The package will be saved to the package file "D:\Vera\Datamola\_2022\Labs\U3.SQL Server Integration Services (SSIS)\Lab1\scripts\U03\_Lab1\_Task1\Package1.dtsx".
- The package will not be run immediately.

Provider mapping file : C:\Program Files (x86)\Microsoft Visual Studio\2019\Community\Common7\IDE\Extensions\Microsoft\SSIS\160\MappingFiles\MSSQLToSSIS10.XML

Help < Back Next > **Finish** Cancel

Completes the wizard

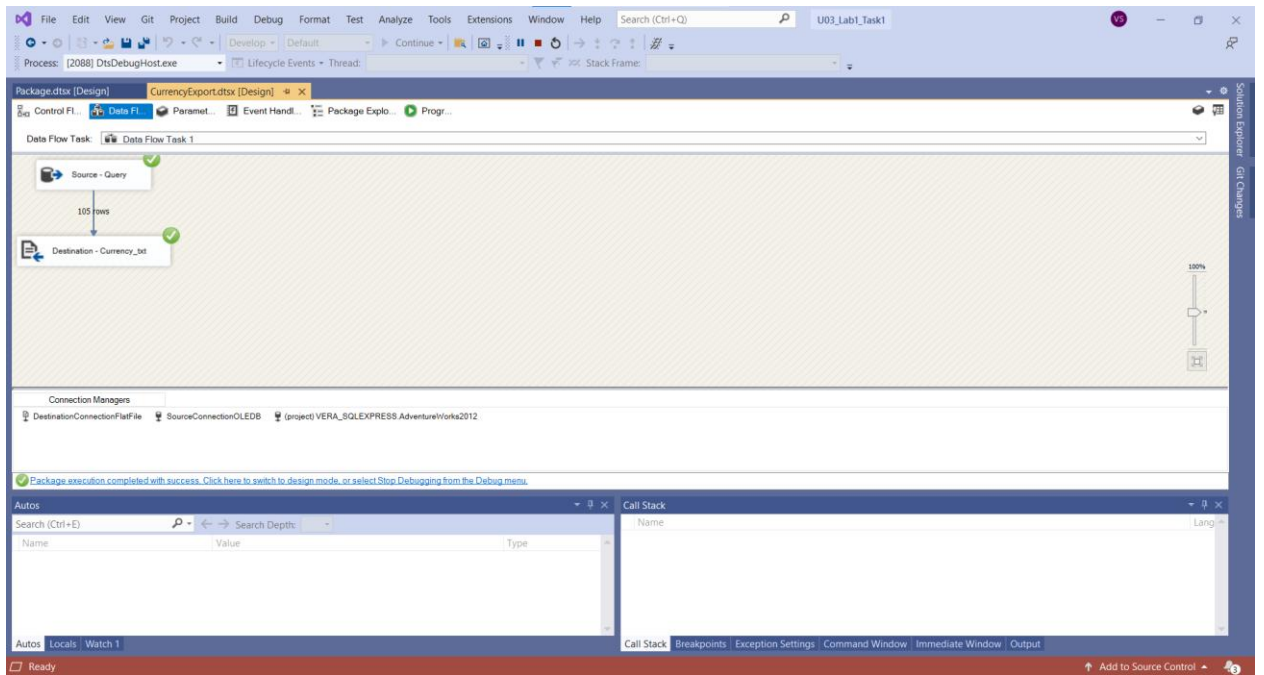

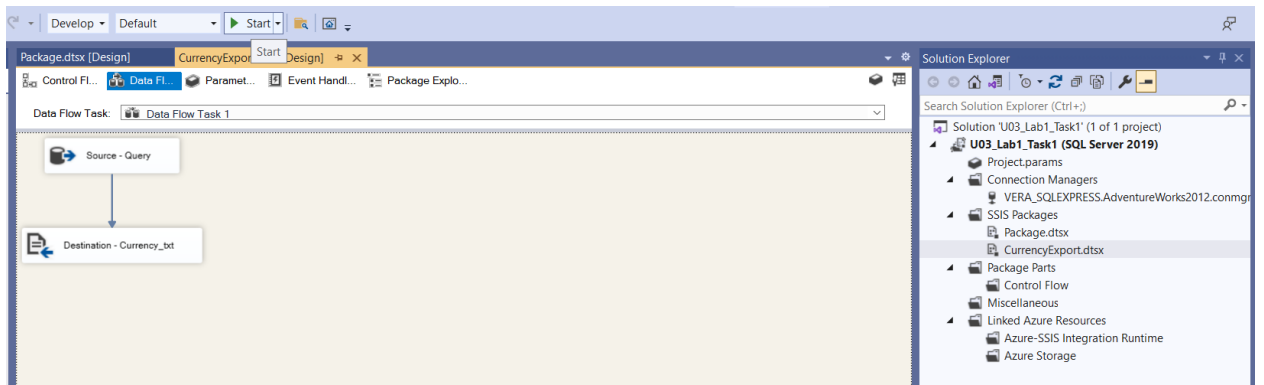

## 1.2. Exercise 2: Running an Integration Services Package

Rename the the package from Package1 to CurrencyExport.

Let's run the CurrencyExport package from Visual Studio and confirm that the export completed successfully.

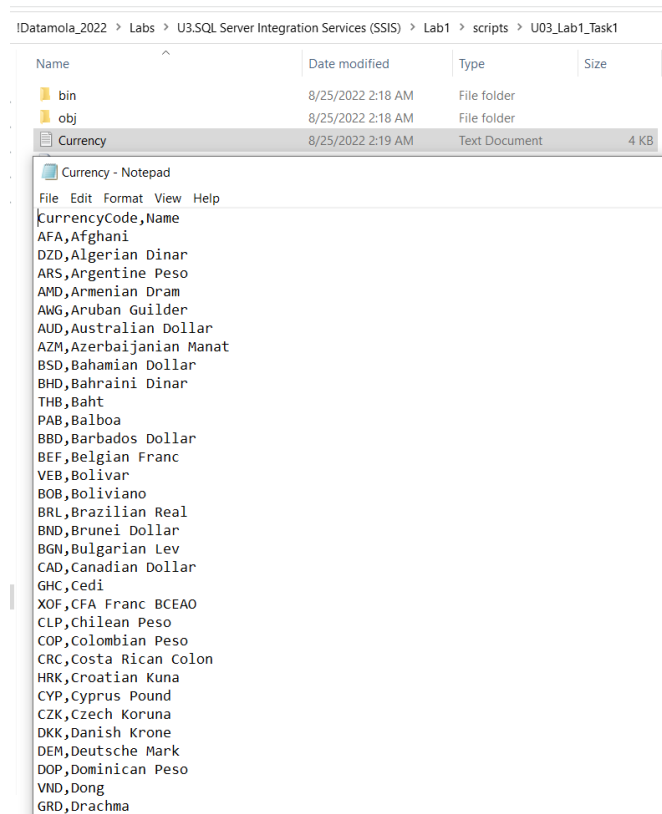

Package execute completed with successful.

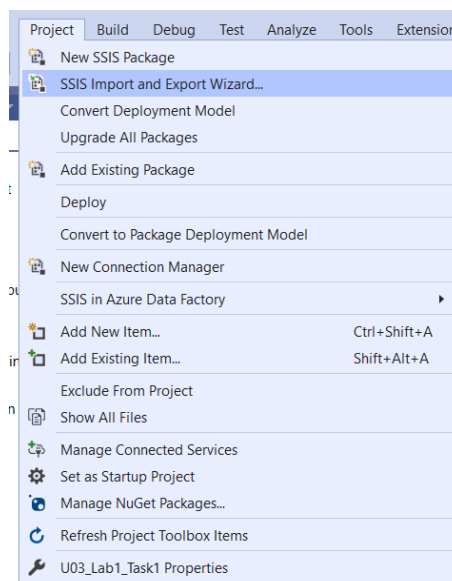

Let's see how the package worked. Did the data get transferred to the file?

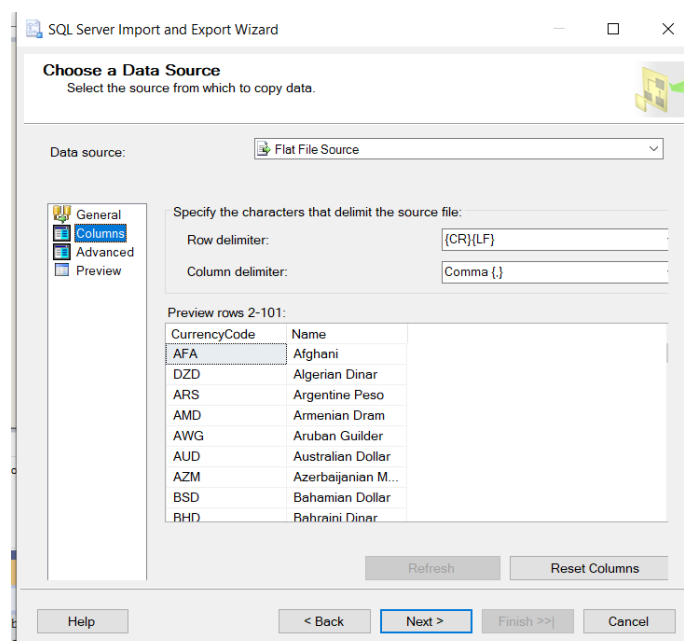

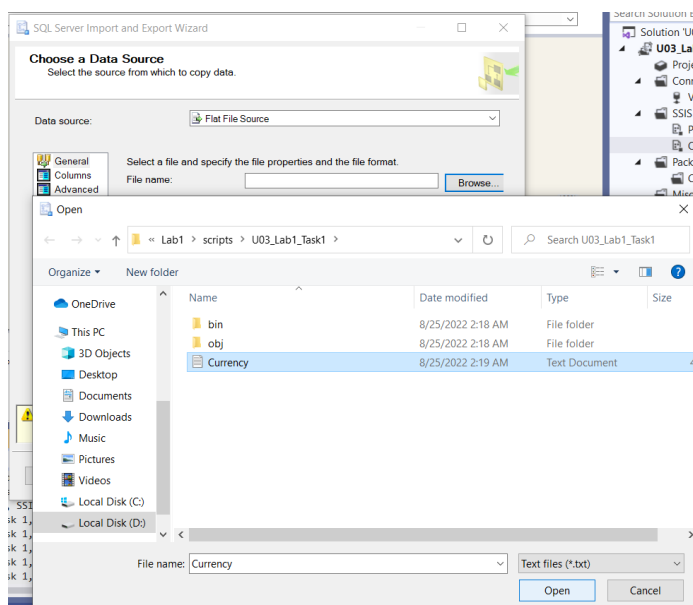

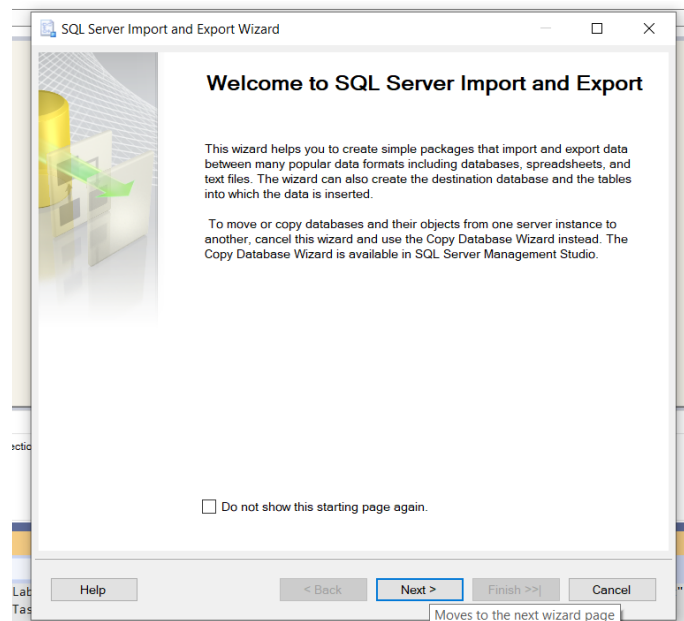

Result: Output file that contains the list of currencies

### 1.3. Exercise 3: Import Data Using the Import and Export Wizard

Let's Import Data from the flat file (Currency.txt) to the SQL database Using the Import and Export Wizard.

SQL Server Import and Export Wizard

**Choose a Data Source**  
Select the source from which to copy data.

Data source: Flat File Source

General Columns Advanced Preview

Configure the properties of each column.

CurrencyCode	Name

Misc

Name: CurrencyCode

ColumnDelimiter: Comma [,]

ColumnType: Delimited

InputColumnWidth: 0

DataPrecision: 0

DataScale: 0

DataType: Unicode string [DT\_...]

OutputColumnWidth: 50

TextQualified: True

Name

New Delete Suggest Types...
